If there is a risk of falling objects or where head space is restricted it is a requirement, in almost every industry or application to use Head Protection. In addition, Head Protection provides protection against collapsing structures, protruding objects and electric shock.
• Damaged head protection must be replaced immediately
• Helmets must fit the wearer correctly
• The peak of a helmet must always be worn at the front
• The helmet must not be defaced with stickers, ink, paint or indentations
• Helmets must never be stored in direct sunlight
